Allowable Subject Matter

1. Claims 4 and 8 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 4, Staney (US 5,512,913) teaches an antenna device comprising a reflector; and a receiver receiving reflected radio waves from one side of the reflector, wherein the one side of the reflector includes a plurality of different lens shapes, the plurality of lens including a first lens with a first radio wave reflective characteristic, a second lens with a second radio wave reflective characteristic, the first and second radio wave reflective characteristics being different to selectively reflect radio waves with particular frequency ranges to the receiver, a third lens having a third radio wave reflective characteristic which is different from the first and second radio wave reflective characteristics to selectively reflect radio waves with particular frequency ranges to the receiver, and a fourth lens having a fourth radio wave reflective characteristic which is different from the first, second and third radio wave reflective characteristics to selectively reflect radio waves with particular frequency ranges to the receiver. Staney, however, fails to further teach the configuration of an array of each of the first, second, third and fourth lenses on the one side of the reflector.

Claim 8 is allowed for depending on claim 4.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
